

FP2 - TIP 'O THE WEEK #58

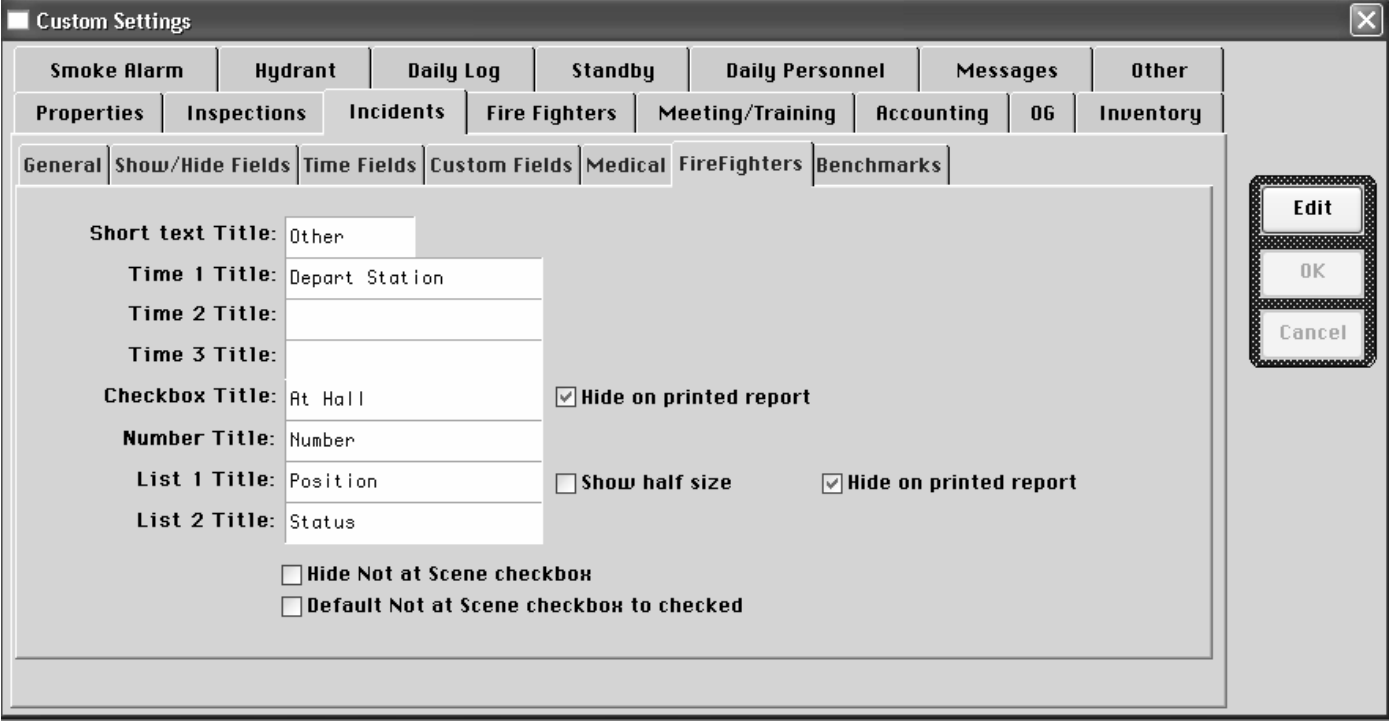

RECORDING THE POSITION OF A FIREFIGHTER AT AN INCIDENT

Recording the Position of a Fire Fighter at an Incident.

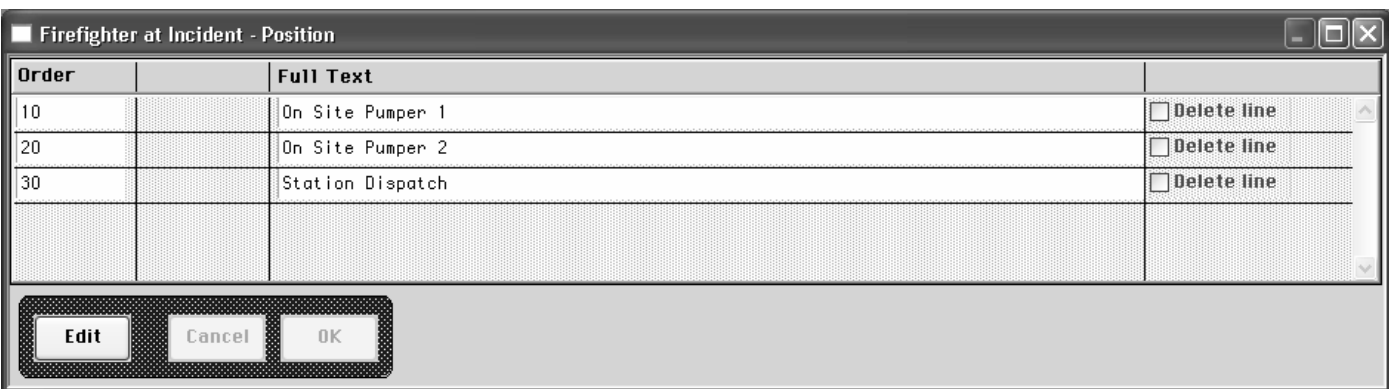

In FirePro, you can customize the software to track many different items. One item that a number of departments want to keep track of is the position that each firefighter covers at an incident.

To do this, first you will need to go to your Set-up menu to name the field. Set-up → Custom Settings → Incidents → Firefighters

You can use the "List 1 Title" field for this purpose. Enter "Position" into the field. You can also choose whether you want this field to appear on the printed report or not with the "Hide on printed report" checkbox.

Next, go to your Maintenance menu to add values for this field. Maintenance → Edit-Pop Up Lists → Other Incident Lists → FF at incident – Position

Populate the list with the positions you wish to track.

Now you're all set to track positions at incidents.

On the incident window, click the "FireFighter" button to bring up the "Fire Fighters at response..." window. After you have selected the firefighters that were at the incident, select the position from the drop down list you created.
